Same TNG galaxies: property contrast across environment quartiles
Quenched fraction contrast (percentage points)
g − r contrast (mag)
Capped log sSFR contrast (dex)
True matter field
Dense tracers
BGS-density tracers
R = 2 h⁻¹ Mpc
R = 7 h⁻¹ Mpc
Highest minus lowest trace quartile within stellar-mass bins; 95% paired spatial bootstrap intervals
Fixed held-out galaxies at z = 0; three paired fits; one TNG300 box
